

Future learning

Learning Management System

A complete solution for online education.

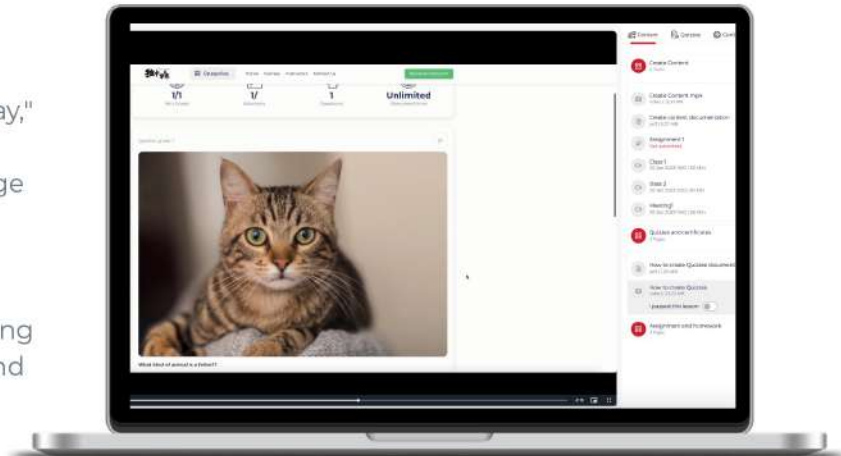

Introducing our specialized services for the education

We provide customized software solutions for schools of all levels, including kindergartens, tuition centers, individual instructors, and universities. Our team of experienced IT developers has created modern, scalable, and flexible systems that can help educators and schools efficiently manage their operations and improve student outcomes.

What is learnn.today?

Our flagship product is called "learnn.today," a SAAS-based learning management system (LMS) that helps educators manage and deliver educational courses and content to learners. With features like progress tracking, assessments, and feedback, our LMS facilitates online learning and communication between teachers and students.

Most Probably Included Best Features Ever

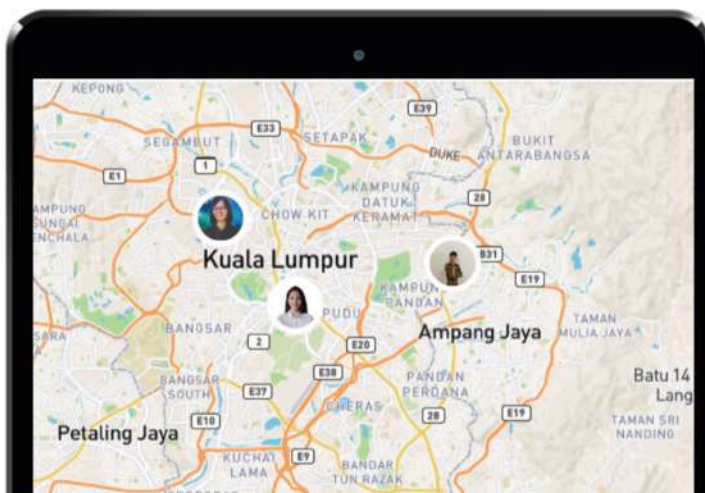

- 01. Deliver courses**

Learnn platform supports multiple content types such as video courses, live classes (Webinars), text-based courses (Plugin), SCORM courses (Plugin), and articles.
- 02. Accounting system**

Learnn includes a built-in accounting system that provides transaction tracking, sales analysis, advanced reports, manual accounting, payouts, invoices, offline payments, etc.
- 03. Store and marketplace**

You can start an ecommerce store by selling physical (kits, books, etc) & virtual products along your courses as a part of bundle.
- 04. Online video meetings**

In addition to educational materials, instructors and organizations will be able to sell online meetings and students will be able to book online, in-person, and group meetings.
